

## Pinchers™ » Pill hiding dog treats with probiotics

Giving your dog medication can be messy and stressful but it doesn't have to be. VetriScience®'s Pinchers™ are delicious pill hiding treats that make it much easier to give your dog medication.

Common pet medications can lead to side effects that slow down your dog's recovery. Pinchers™ feature vet-recommended probiotics to help your dog's digestive system deal with potential side effects from treatment. When given with medication, probiotics can help your dog feel like their lovable self before long!

### Easy to Give and Easy to Take™

Pinchers™ are designed to be easy to give and easy to take. The unique, triangular-shaped chew fits most pills, capsules and tablets without excessive shaping and won't leave you with greasy, sticky hands.

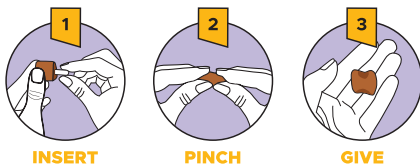

Pinchers™ chicken liver-flavored chews are not only delicious but mask the scent and taste of medication from your pup. At only 10 calories per treat, Pinchers™ are a healthy alternative to most human foods and comparable pill hidiers.

### Help Your Dog Feel Better Faster

Medication can wreak havoc on your dog's digestive system and cause side effects like diarrhea, constipation and drowsiness. Pinchers™ include probiotic strain *Bacillus coagulans* to promote a normal recovery time by supporting digestive and immune health throughout treatment.

### DIRECTIONS FOR USE:

Pinchers™ are suitable for dogs of all ages, breeds and sizes.

### PROBIOTICS SUPPORT:

- » Digestive & immune health
- » Beneficial gut flora
- » Regularity
- » Nutrient absorption

### GUARANTEED ANALYSIS:

Levels represent minimums unless otherwise stated:

|                             |       |                     |
|-----------------------------|-------|---------------------|
| Crude Protein (Min.)        | ..... | 12%                 |
| Crude Fat (Min.)            | ..... | 9%                  |
| Crude Fiber (Max.)          | ..... | 2%                  |
