

Merrick's BLUE RIBBON®

NEW-HOOF™ Concentrate

Triple-Action Formula

for Dairy Cattle

New-Hoof™ Concentrate is a carefully formulated foot bath additive to help maintain normal hoof health when used in combination with proper nutrition and good herd management practices. New-Hoof™ Concentrate contains Ionized Copper along with surfactants.

DIRECTIONS FOR USE:

Use New-Hoof™ Concentrate in foot bath as part of your routine hoof care program. Prepare the foot bath using one quart of New-Hoof™ Concentrate per 50 gallons of water (1:200 dilution). Change the foot bath every other day or every 500 head. It is recommended to use New-Hoof™ in rotation with other foot bath additives. For larger operations, prepare a mixture using one part New-Hoof™ Concentrate and two parts water. Clean the hooves well and spray New-Hoof™ thoroughly. Continue to spray after every milking, as needed.

GUARANTEED ANALYSIS:

(minimum unless otherwise stated)

Ionized Copper (Cu).....	0.67%
Non-Ionized Surfactants	7.00%
Inert Ingredients	92.33%
